PROJECTS

Weather Dresser Python, Django, HTML, CSS, Heroku

[GitHub](#)

- Worked closely and continuously with the client throughout development to create an optimal, high impact personal solution.
- Retrieved and processed JSON data from a third party API for front end display.
- Translated UI mockups from Dribbble into HTML and CSS layouts.
- Implemented a mobile responsive design.

Starts With Ends With Python, Flask, JavaScript, React, AWS (RDS, Lightsail, Amplify)

[GitHub](#)

- Implemented a full stack application using Flask, React, and PostgreSQL.
- Created an API back-end to execute database searches and serve the results in JSON.
- Containerized the Flask back-end using Docker and deployed it with Amazon Lightsail using the AWS CLI.
- Debugged issues in Chrome.
